CartiereCarrara
CARING FOR WHAT'S NEXT

ABOUT US

Cartiere Carrara is one of Europe's leading producers of tissue paper and, since 1873, we have been dedicated to this ancient craft with passion and expertise, constantly innovating it. For five generations, the Carrara family has led the company with an unwavering commitment to quality, making research and innovation the cornerstones of our growth. Thanks to an integrated production process, we manufacture semi-finished products in-house and transform them into a wide range of finished Made in Italy products – toilet paper, hand towels, kitchen rolls, tissues, and napkins – serving both the professional and consumer markets in over 50 countries worldwide.

Cartiere Carrara's work is driven by passion and deep-rooted ties to a region rich in art, beauty, and manufacturing tradition – values we have embraced and that guide us every day. With our eyes set on the future and the responsibility of a legacy built over time, we continue to represent the excellence of Made in Italy, combining quality, innovation, and respect for the environment and the community.

THE GROUP

850	Employees	
7	Manufacturing hubs	
10	Paper Machines	
60	Latest generation Converting lines	
300.000	Tons/year tissue product of production capacity	
50	Countries served	
1458	Certified products

THE COMPANIES IN THE GROUP

ITALY

R.C.TT S.r.l.

Castel del Piano (Grosseto)

Specialised in the Table Top sector for Professional and Retail markets.

Carrara Lab S.r.l.

Capannori (Lucca)

Transforms semi-finished products of Cartiere Carrara, producing articles in tissue paper destined mainly for the large-scale retail market.

CRC Tissue S.r.l.

Sermoneta (Latina)

EUROPE

CARTIERE CARRARA UK Ltd

King's Lynn -UK

Company registered at Companies House in the United Kingdom. Distributes wholesale disposable tissue products imported from Cartiere Carrara, through 450 distributors for markets HO.RE.CA., Janitorial and Facilities Management.

CARTIERE CARRARA BV

Son En Breugel - BENELUX

The new logistics platform in the Netherlands brings Cartiere Carrara closer to its customers and enhances the development of the Benelux market.

SUSTAINABILITY

Sustainability is one of our core values, guiding every decision we make and directing our commitment towards environmental protection, the transition to a circular economy, and the promotion of inclusive and responsible economic growth. For us, it means building a better future, where social and environmental well-being is at the heart of our daily actions.

In 2023, we defined our Sustainability Manifesto, a strategic document that outlines the guidelines for our actions in the environmental, social, and economic spheres. Additionally, from 2024, we have joined the United Nations Global Compact, the leading international initiative for corporate sustainability. Through this commitment, we are integrating the ten core principles of the Global Compact into our business processes, ensuring respect for human rights, labour standards, environmental protection, and fighting corruption, thereby contributing to the Sustainable Development Goals on a global scale.

For us, sustainability is a strategic choice that makes our company more competitive and resilient in the long term. Our commitment to people, the community, and the environment translates into concrete actions, measured against the most stringent international standards and voluntary certifications. We invest in safe production technologies, training for accident prevention, and the meticulous adherence to safety regulations in every department. We only use certified raw materials and cellulose that respects the lifecycle of the forests from which it is sourced, and we actively support reforestation projects. We are committed to reducing energy and water consumption and minimising greenhouse gas emissions, as documented in our annual Sustainability Report.

A tangible example of our commitment is the “Paper that Plants Trees” project, launched in 2020 in collaboration with Rete Clima and Compagnia delle Foreste. The two reforestation projects, “Kilometroverde® - Lucca” and “Polycyclic Plantations”, aim to preserve natural areas near our production sites and develop initiatives with an educational value, raising awareness among future generations about the importance of sustainability and protecting our planet.

Every step we take is for the future, because it is today that we build what is to come. **Caring for what's next.**

CARING FOR WHAT'S NEXT

1. Care for people and protection of rights

Creating a sustainable business model, for us, means generating positive impact on people and guaranteeing opportunities for growth and wellbeing, starting from the work environment, from health and safety, from complete respect for rights, and from the enhancement of individuals' unique traits and talents.

2. Prosperity for the community and local territory

We want to strengthen the relationship with local communities through cultural, social and educational projects. To this end, we commit to developing a structured program of initiatives destined to the territories where we operate, and to measuring its social impact.

3. Value chain initiatives

We want our sustainability goals to be embraced and actively pursued by our partners along the entire value chain. To this end, we promote projects in collaboration with suppliers and clients who share our principles, and ask our partners to comply with our ESG policy.

4. Responsible use of water

Water is a precious resource, at the heart of our transformation cycle, and we always use it with care and respect. We promote constant improvement of our activities' water footprint, with continued investments in research and development geared towards keeping average consumption below 4 cubic meters per metric ton of paper manufactured.

5. Saving energy and reducing emissions

We make substantial investments to limit our energy consumption, favoring alternative sources that can replace fossil fuels and minimize carbon dioxide emissions into the atmosphere. Year after year, we increase our use of self-produced renewable energy and commit to progressively expanding the share generated from sources certified with guarantees of origin.

6. Circularity and regeneration

We commit to optimizing the use of raw and auxiliary material in our production processes and along the entire value chain, preferring options that are recycled and responsibly sourced. With the support of our suppliers, we promote the use of secondary raw materials deriving from production waste, and we aim to maximize the adoption of recyclable packaging, so as to reduce the share of non-recoverable waste under 35%.

7. Product life cycle and biodiversity

We monitor our products in every phase with Life Cycle Assessments aimed at reducing their potential environmental impacts. In order to minimize waste, we commit to developing innovative technologies and solutions that allow for the efficient use of our products. We apply PEFC-FSC® standards to everything we make, selecting recycled raw materials and certified cellulose, which respect the chain of custody of the original forests.

8. Sustainability culture

Sustainability requires individuals' commitment to continuous improvement, but can be achieved only with the strength of collective actions. This is why we want to play an active role – within our organization and beyond – in the conception, dissemination and promotion of initiatives aimed at raising awareness and engaging other players in the value chain on the issue of sustainability.

9. Forestation projects

Over the past few years, we have planted 12,000 trees through completely self-financed forestation projects, carried out on our own properties. Looking ahead, we will continue the Paper that plants trees project, adding another 150,000 trees, promoting further initiatives in favor of the territory, and giving the community a dedicated training center focused on environmental sustainability issues and on the enhancement of the forest-paper supply chain.

10. Transparency and reporting

We believe it is essential to communicate responsibly and to highlight the actions we take, starting from clear and measurable objectives to promptly and transparently report on the progress made and the results achieved, applying criteria that all our stakeholders can share and understand.

Making high-quality paper since 1873

Cartiere Carrara
CARING FOR WHAT'S NEXT

OUR COMMITMENTS

Cartiere Carrara's certifications reflect our ongoing commitment to quality, safety, and sustainability. Recognized nationally and internationally, they ensure compliance with strict standards throughout the entire production chain, from raw material selection to environmental protection and employee well-being. A continuous improvement journey that reaffirms our responsibility towards customers, partners, and communities.

FORTE
HAVANA

Products made with raw material deriving from the recycling of cardboard, which gives it the characteristic light havana color. The range is designed to meet the needs of image and cost in use in environments sensitive to the theme of material reuse.
